Subject: On trustworthy results of ship powering trials and monitoring

Dear John,

many thanks for your quick response, one of the very few as usual, and my best wishes for the rapid recovery of your health.

And many thanks for the information, which must be very disappointing for you and is so for me. I had already been wondering about the new deadlines.

'Forgetting' this incredible situation please forward the letter, which I have sent to the members of the pertinent ITTC Committees and other colleagues and friends, also to your young colleague working on ship powering trials and suggest, that he should contact me for indepth discussions.

Yours, Michael.

Michael,

I will take a look, just be patient!

...

...

If the ATTC does not happen, I would like to present your work at the next Chesapeake Powerboat Symposium, of which I am also the Chair, next June. That is if it is OK with you.

Sorry, I will let you know how I do in this political battle.

John.

Dear Dr. Schmiechen,

Thank you very much for sending me the e-mail giving details of your latest studies on ship powering trials. I am greatly honoured to be included among the list of people to whom you have sent the results of your studies.

I do not think that I can contribute any meaningful comments to the novel approach that you are adopting with respect to ship powering trials, except to wish you continuing success in your efforts.

With best wishes yours sincerely,  
R. P. Gokarn.

Dear Michael,

Thank you very much for your e-mail. I am very glad to know you are very active continuously.

I hope that your assertion will be accepted widely.

Kuni Nakatake.

Lieber Herr Professor,

das Rundschreiben habe ich mit Interesse gelesen und bin nun gespannt, ob und welche Reaktionen sich zur `virtuellen´ 3rd INTERACTION ergeben.

Meine offenen Fragen sind in meiner e-Mail vom 22.04.2017 enthalten, die bei Ihnen vorliegen müsste.

Ihr Anhang für die ITTC ist bei mir leider verloren gegangen, bevor ich ihn lesen konnte.

Mit freundlichen Grüßen

Ihr Klaus Wagner
