Subject: Fwd: On trustworthy results of ship powering trials and monitoring

Folks,

As Chairperson of the upcoming 30th ATTC I had the pleasure to communicate with Dr. Michael Schmiechen (Berlin Model Basin Ret.) Unfortunately he will not be able to attend the ATTC this year, however Eric Giesberg (NSWCCD) has volunteered to present his paper for him.

Attached is his most recent correspondence that you might be interested in reading. I also recommend visiting his Web Site at <http://www.m-schmiechen.de/> .

Michael would appreciate any and all comments!

Thank You for you attention,

John G Hoyt III

Chairperson 30th ATTC
